

SPOTLIGHT ON A MEMBER

ANGELS OF FLIGHT

Angels of Flight was founded in 1988, by none other than Gail Courneyea, RN. Globally we specialize in air medivac and land transfer in North America. It is the first company globally to achieve ISO 9001 standards of excellence. Because of the ISO rating, they follow quality standards, guidelines and criteria which allow them to offer our clients quality patient care above and beyond all others.

Angels of Flight operates out of Peterborough and Oshawa Airports and most recently Yuma Arizona. All calls and dispatching is done at the main base where it all started, in Peterborough, Ontario. One call does it all when calling Angels of Flight; no need to contact numerous individual service providers, air and land ambulance companies, hospitals, physicians, and airlines. They identify every potential problem including travel documents and security issues to ensure an uninterrupted medical transfer.

Since Angels of Flight is dealing with everyday medical needs in Critical Care Patient transfers, they have a medical director, Dr. Bill Swales, whom consult on an ongoing basis. Dr. Bill Swales has been associated with Angels of Flight since 1998 and currently works as an emergency Physician.

Angels of Flight is not only committed to patient care needs in local non-emergency land service but by giving back to the community. They have been involved in many events in the Durham area such as the 2004 "Pull For Kids", to raise money for the Lung Association of Canada, as well as school fairs and air shows.

Angels of Flight is dedicated to providing the best and highest quality of care to patients and clients all over the world. For more information check its website at www.angellofflightcanada.com.
